Valuable insights for better clinical and economic outcomes

In this month's issue, we're highlighting various clinical studies and third-party research around shock wave as a treatment option. We hope these studies provide valuable insights for physicians who use or are considering using EPAT in their own practices.

In addition, read interesting perspectives published in *TIME Health* on treating plantar fasciitis. And don't miss another great success story from a medical professional who was able to differentiate his practice from others in his area by offering EPAT as a treatment option for active patients. Enjoy!
